

## **Music Medicine Pill™**

the customized Music 4 Life® Music Medicine method

In order to receive maximum benefit of this customized home listening program aka Music Medicine Pill, this approach requires a minimum of four sessions requiring the music therapist's involvement up to thirteen hours over five weeks.

Typical therapeutic goals from more than 100 case reports: reduce stress, frustration, tiredness, insomnia, anxiety, anger, grief, depression, confusion, nightmares, irritability, worry, and enhanced engagement with life, improved ability to focus, communicate, relax, with increased happiness and job performance. One survey of addiction recovery patients (n=603) reported 94% improved Emotional Intelligence after one-time listening to one 30-minute Music Medicine Pill.

**Session #1** Review 3 completed assessments to pre-qualify, sign agreement to enter MEE Study (previous IRB approval), complete exploratory treatment session to determine Music Medicine playlists, Mood Sequence Formula™, and listening regimen: 2 to 5 hours

**Playlist & Booklet production:** 1 to 2 hours

**Session #2** 1<sup>st</sup> Listening to Music Medicine Pill: 1 to 2 hours

**Session #3** Mid-way evaluation after 7 listenings: 1 to 2 hours

**Session #4** Final evaluation after a minimum of 14 consecutive listenings: 1 to 2 hours

**Total Time Billed: 6 to 13 hours over 3 to 5 weeks**

NOTE: It is possible to meet some or all therapeutic goals (identified within Client Inventory) within the two week daily listening regimen. Any post-production adjustments to the Music Medicine Pill and/or additional sessions may be billed as additional hours.

Sessions are online through a HIPPA compliant platform. Visit [MusicTelemedicine.com](https://MusicTelemedicine.com) to schedule a free 15-minute consultation with Judith Pinkerton, LPMT, MT-BC, Founder/CEO of Music 4 Life Inc., or another Music 4 Life music therapist.
